Serona Skin & Laser Clinic assumes no liability in case of giving false information.

3. CONTRACTUAL OBLIGATIONS

I agree on photo taking and using the photos for advertising purposes.	YES	NO
--	-----	----

4. WARRANTY

Serona Skin & Laser Clinic accepts liability in compliance with the legal measures and regulations in the case of negligence or carelessness or intentionally or negligently caused injuries or threat to life, body and health. *Serona Skin & Laser Clinic* is liable for violations of the obligations specified under the Agreement.

5. EXPLANATION

The client is informed in detail by *Serona Skin & Laser Clinic* about specific risks of eyebrow drawing treatment using microblading technique.

The following risks are specifically explained to the client:

During the treatment, despite the staff expertise and all the precautionary measures, an injury is possible. Despite the application of the most advanced and the top quality pigments, allergic reaction is possible but rare. The client is informed about this and he/she assumes liability. During and after the treatment temporary swelling, redness and/or itching may occur. Experience tells us that these symptoms are temporary.

Depending on the skin structure after the first treatment small scabs with a loss of drawn hairs may occur and colour intensity may change. In the first seven days eyebrows are up to 40% darker and 10-15% thicker. Colour *i.e.* colour reflection depends on the natural skin pigment. The shape is determined according to the face proportions. Symmetry is determined digitally, with closed eyes because of the negative impact of facial expression. The pigment is absorbed differently due to differences in the skin quality, thus there is no warranty for the treatment success. Depending on the skin structure it should be noted that change in the colour intensity is possible and that one or more additional treatments will be required.

The minimum or maximum duration of eyebrow drawing treatment cannot be determined with certainty, nor can the warranty be given on performed treatment. The first correction is done 4-6 weeks after the treatment. For oily skin it is necessary to perform more corrections. Permanent make-up always leads to the skin injury. Therefore, it is important to carefully and gently nurture your skin after the treatment to allow healing without complications. Inadequate care in healing phase of the skin can lead to poor results and *Serona Skin & Laser Clinic* cannot be liable for it.

In the next ten days the client is required to pay attention to the following:

- Immediately after treatment aftercare cream is applied. You should clean brows with cooled boiled water and reapply cream every 40 mins until you go to bed. This is to prevent the scab formation. (do not excessively rub)
- Day 2 clean and cream every 2 hours.
- Day 3 clean and cream every 3 hours.
- Day 4 to ten, continue as above only morning, afternoon and night time.
- Do not get your brows wet for 10 days.
- For post-treatment please do not use any other creams except the ones provided to you in order to prevent possible infections or allergic reactions.

In the first two weeks after the treatment avoid public bathing, sunbathing, tanning salon, sauna, beauty treatments and intense training accompanied by sweating (sport activities), contact with the dust (household chores, etc.). *Serona Skin & Laser Clinic* is not liable in case of improper post-treatment care.

TOP UP

Top Up must be completed as part of this overall treatment no sooner than 5 weeks after initial treatment. Maximum time allowed for top up is 8 weeks. After 8 weeks treatment is not considered a top up and extra charges may apply.

6. COMPETENCE

I confirm that I have read and understood the aforementioned information.	YES	NO
I received a clear and understandable response to all my questions.	YES	NO
The treatment procedure and post-treatment care was explained to me in detail and I agree with it.	YES	NO
I do not have any further questions	YES	NO
